EDUCATION

PhD, Biomedical & Chemical Engineering | Howard University, Washington, DC | 2024–Present
Graduate Research & Teaching Assistant | GPA: 4.0/4.0
Awards & Honors: Ernest E. Just–Percy L. Julian Graduate Research Fellowship (Howard University)
Research Focus: Sustainable fractionation of underutilized agricultural feedstocks for food and materials applications; tribo-electrostatic separation (TES) for sustainable materials recovery.

Master of Engineering, Chemical Engineering | University of Ottawa, Ottawa, Canada | 2020–2022
GPA: 3.87/4.0 (Distinction in all graduate courses)
Relevant Coursework: Water & Wastewater Treatment, Biomaterials, Nanotechnology, Advanced Thermodynamics.

Bachelor of Engineering, Chemical Engineering | Covenant University, Ogun, Nigeria | 2013–2018
GPA: 4.47/5.0 | Diploma in Leadership Development.

EDUCATION & PROFESSIONAL DEVELOPMENT

College & University Faculty Preparation Certification Program | Howard University | Jan 2026–Present
• Formal training in higher-education pedagogy, curriculum design, assessment strategies, inclusive teaching practices, and academic career preparation.

RESEARCH EXPERIENCE

PhD Researcher – Sustainable Biomass Processing | Howard University | 2024–Present
• Investigate tribo-electrostatic separation for selective recovery of cellulose, hemicellulose, lignin, and protein fractions from agricultural biomass.
• Analyze charge transfer mechanisms, separation efficiency, and yield to support circular-economy and low-energy processing strategies.
• Develop experimental protocols, perform statistical analysis, and present findings through scientific writing and data visualization.

Conference & Symposium Participation
• Participant, **Annual Research Month Symposium**, Howard University.

TEACHING EXPERIENCE

Graduate Teaching Assistant – General Chemistry | Howard University | 2024–Present
• Lead weekly laboratory sessions for 20–30 undergraduate students, emphasizing experimental design, safety, and analytical techniques.
• Deliver pre-lab lectures linking chemistry fundamentals to sustainability and engineering applications.
• Mentor and support diverse students to promote STEM retention and academic success.

TECHNICAL & RESEARCH SKILLS

Computational & Data: MATLAB, Polymath, SPSS, Python, SQL, PostgreSQL, simulation & modeling, data visualization.
Engineering & Scientific: Tribo-electrostatic separation, biomass fractionation, process modeling, thermodynamics, transport phenomena, sustainable materials processing.
Analytics & Systems: Tableau, Power BI, PI Systems, WAVE, SAP S/4HANA, MS Dynamics 365, MS Power Apps.
Professional: Research design, technical writing, project management, curriculum development, cross-functional collaboration, stakeholder engagement.

LEADERSHIP & SERVICE

Co-Founder & Operations Manager | Beta-Learning Tutoring Services | 2022–Present
• Co-founded an EdTech tutoring initiative delivering STEM education to students and job seekers.
• Designed analytics-driven learning pathways, tutor training frameworks, and student progress tracking systems.
• Led operations, platform development, and program scaling.

Professional & Community Engagement
• Alumni Mentor, University of Ottawa Ten-Thousand-Coffees Program.
• Member, Nigerian Society of Chemical Engineers.
• Volunteer, uOttawa Professional Development Club.

PROFESSIONAL EXPERIENCE

Assistant Production Manager | Grand Cereals Ltd. (UAC Group), Nigeria | 2023–2024
• Implemented semi-automated process improvements reducing workflow inefficiencies and labor hours.
• Enhanced MRP and planning accuracy through dashboard-based analytics.
• Led 5S, safety, and HSE initiatives supporting operational excellence and compliance.

Graduate Management Trainee – Technical & Manufacturing | Grand Cereals Ltd. | 2023
• Executed plant improvement projects achieving ~7% process waste reduction.
• Supported continuous improvement, safety, and manufacturing optimization efforts.

Product & Technical Support (Engineering & IT) | Konga Group; Seline Woman Stylehouse | 2018–2023
• Supported ERP/CRM deployment, cloud migration, and data-driven system improvements.
• Improved organizational efficiency through technology-enabled workflow optimization.

CERTIFICATIONS

• Six Sigma Yellow Belt
• Data Analyst Nanodegree (ALX–Udacity)

INTERESTS

Sustainable materials • Energy efficiency • Water systems • Environmental policy • Urban sustainability • STEM education • Community impact
